DETAILED ACTION

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 4, 11-16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Fearnot et al. (5609629).

Fearnot (Fig. 1; col. 4, lines 23-39; col. 8, line 20 to col. 9, line 21) disclose a stainless steel stent, for example, including coatings of soluble polymers (col. 4, lines 30-35) and a radiologic opacifier material such as iodine-containing compound (line 10, col. 9).

It is clearly recognized that when radiologic opacifier material in the soluble bioactive polymer dissolves, the radiologic profile of stent 12 will be less pronounce (smaller Hounsfield number) and the morphology of the surrounding tissue will be seen more clearly. Alternatively, it would have been obvious to have less radiologic opacifier material after dissolving with bioactive material to have a CT or MRI profile of stent 12 with smaller Hounsfield number.
